LED Flush Light 23 and 29

23 cm and 29 cm popular style flush mount lights with integrated led system based on Samsung LEDs. The products offer much higher light output than traditional flush mount with very low energy consumption as well as a very long life span - estimated 35,000 hours or 20 years of normal use. LEDs are rated for 50,000 hours, however due to a very small size of the driver we anticipate a shorter life span of the driver.

Our studies have shown that a traditional 23 cm flush mount lamp equipped with single 40W leading brand light bulb gives the real output of about 150 lumens out of 40 W, which offers the efficacy of 3.75 lumens per watt. Our replacement product gives 400 lm out of 7.5W or 57 lumens per watt, which is 16 times more efficient. Similar numbers show for 29 cm unit. Traditional is giving 300 lumens out of 80 W, ours 520 lumens out of 10.5W. The product offers significant energy savings (up to 85%), more light and unbeatable life span.

Model Number	CPR9 (WW)	CPR12 (WW)
Dimensions	230*50mm	290*50mm
Casting Colour	Silver	Silver
Input Voltage	110-240VAC	110-240VAC
Power Consumption	7.5W	10.5W
Frequency	50/60Hz	50/60Hz

Model Number	CPR9 (WW)	CPR12 (WW)
Lumes Flux	400ml	520ml
Beam Angle	120 °	120 °
Colour Temperature	3000 'K	3000 'K
CRI	≥ 80	≥ 80
Life Span	50000h	50000h

The product meets all required European standards according to CE requirements.

LED Under Cabinet System

Our under cabinet LED light system is based on Samsung LEDs. It offers incredibly simple installation - including a power

supply that can be plugged into regular socket, simple and easy to deal with mounting brackets and connections between the units. The system comes in 2 lengths: 30 cm and 60cm that can be daisy chained with only one power supply. Moreover it offers a lot of light. 30 cm unit offers roughly 350 lumens, which is equivalent of 35W halogen bulb. The system of 3 30 cm units gives over 1000 out of only 10W. It makes it very suitable to leave it on for overnight as a firm ambient light in the kitchen

Model Number	CPLS - 60 (WW)	CPLS - 30 (WW)
Colour	Silver	Silver
Input Voltage	110-240VAC	110-240VAC
Power Consumption	8 W	4 W
Dimensions	60*17mm	30*17 mm
Efficacy	87.5 lm/W	87.5 lm/W
Class of Protection	II	II
Degree of Protection	IP20	IP20
Frequency	50/60Hz	50/60Hz

Model Number	CPLS - 60 (WW)	CPLS - 30 (WW)
Lumes Flux	700ml	350ml
Beam Angle	120 °	120 °
Colour Temperature	3000 'K	3000 'K
CRI	≥ 80	≥ 80
Life Span	50000h	50000h

The product meets all required European standards according to CE requirements.

GU 10 AC LED Light Bulb

Our GU 10 AC LED light bulb is based on unique and incredible AC LED from Samsung.

The product is rated by Samsung for 50,000 hours, which is more than any other LED halogen replacement bulb on the market. The reason for this is the fact that unlike most other LED

products AC bulb does not require a driver. Due to extremely small size and high temperature inside the casing the driver is especially vulnerable for failure. Eliminating the driver altogether makes the product that much more stable.

GU 10 AC LED offers 280 lumens which is equivalent of 25W traditional halogen bulb. It uses 5W of energy which gives direct savings of 80%. More importantly however regular halogen lights are rated for 3,000 hours hence require very often changes and are not so cheap. Combined savings of energy and replacement costs make our product very attractive from that point of view.

Model Number	GU 10-3K	GU 10-5K
Dimensions	50*60mm	50*60mm
Colour	Silver	Silver
Input Voltage	110-240VAC	110-240VAC
Power Consumption	5.5W	5.5W
Frequency	50/60Hz	50/60Hz
Efficacy	46 lm/W	51 lm/W
Degree of Protection	IP20	IP20

Model Number	CPR9 (WW)	CPR12 (WW)
Lumes Flux	400ml	520ml
Beam Angle	120 °	120 °
Colour Temperature	3000 'K	3000 'K
